Case study: Mask RCNN

© 2019 Philipp Krähenbühl and Chao-Yuan Wu

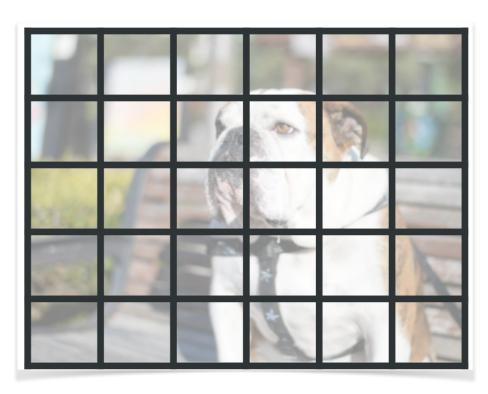

MaskRCNN

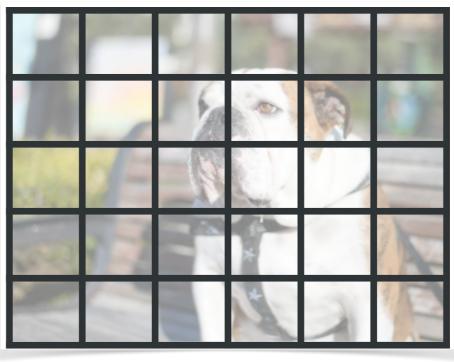

- Instance segmentation
- Segmentation by detection

MaskRCNN - trick 1

- ROIPooling blurs activations
 - Solution: ROIAlign
 - ROIPooling with linear interpolation

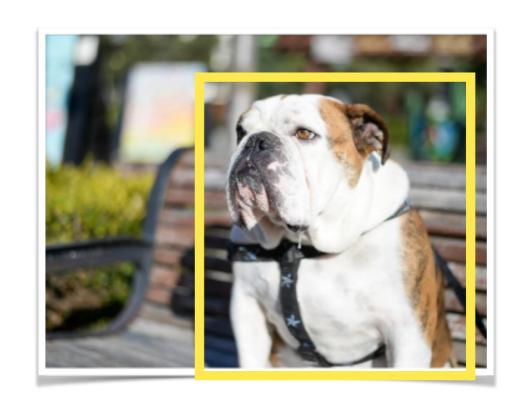

MaskRCNN - trick 2

 Masks do not need to be class specific

MaskRCNN - trick 3

 Masks are best predicted using an FCN

Summary

- MaskRCNN is basic building block for many instance level tasks
 - Pose estimation
 - 3D reconstruction
